RPM- ROTATION DIRECTION METER

"AAROHI" make Rotation direction meter is very compact & specially designed microprocessor based instrument to measure Clockwise or anticlockwise direction of motor. This unique meter detect direction through contact less IR sensors which increases productivity & avoid breakdown.

Specification

Parameter	Description
Range	9999 RPM
Display type	4 Digit 0.56" red seven segment
Least count	1 RPM
Accuracy	0.5%
Computer Interface	Rs 485/ 232
Indication	Clockwise/ Anticlockwise
Auxiliary supply	230V AC \pm 10%
Dimensions	60mm x 160mm x 100mm

Application

- ✓ Production line or QA testing of electric devices
- ✓ Motor Industries
- ✓ Generate testing

Features

Features	Benefit
Class of accuracy: 0.5	Testing according to IS/ IEC standard is possible
Computer interface through RS-485/ Rs-232	Data acquisition is very easy.
Easy to operate	Increases work efficiency
Operate on contactless sensors	Increase productivity & reduce physical damage
0.56" seven segment display	Visible from long distance
